## Best Digital Innovation

Introducing in 2023 (CIBSE UK) to recognise an innovation that has made a significant contribution to digital engineering. The two elements (digital & innovation) are important in BSE in order to stay competitive and include changes in next generation.

This Award recognises and celebrates an innovation that has made a significant contribution to digital engineering in Hong Kong. This may be a piece of software, a project process or other innovation that shows ground-breaking thought.

### Award

- **Best Digital Innovation (for winner)**
- **Merit Award (for Shortlisted)**

### Who should enter

Organizations, facilities managers, building developers/owners, maintenance contractors, individuals, manufacturers or companies etc.

### Eligibility

Entries in this category must be from Hong Kong:

- Entries in this category must be from Hong Kong and should be based on activity delivered during the period **1 January 2017 - 31 December 2021**.
- Entries may be submitted by any or all members (together) of the project team.

### Judging criteria

Successful entries will give details of as many of the following elements of the project as possible:

- Details of the individual, team, organisation, project, product or service involved.
- Explain the innovation, its original objectives and the aspects of construction related digitisation.
- Details of particular challenges or constraints experienced in the development and how they were overcome.
- Details of resources produced and how they were used in the innovation. How will the innovation have been implemented, with evidence of uptake and successful adoption.
- Details of the key measures of success of the innovation and its impacts (intended and unintended).
- How will the impact of this innovation be shared and maintained amongst the target audience or participating organisations and more widely?
